

Styrelsen for Dataforsyning
og Infrastruktur

WELCOME

Workshop on Data Ecosystems and Spatial Data Infrastructure

Agency for Data Supply
and Infrastructure

Sine Valbjørn Schlüter
Master of Science in Political Science

Head of Department at the Agency for Data Supply
and Infrastructure since January 2021

Since May 2023: Head of “Business Development
and Green Transition”

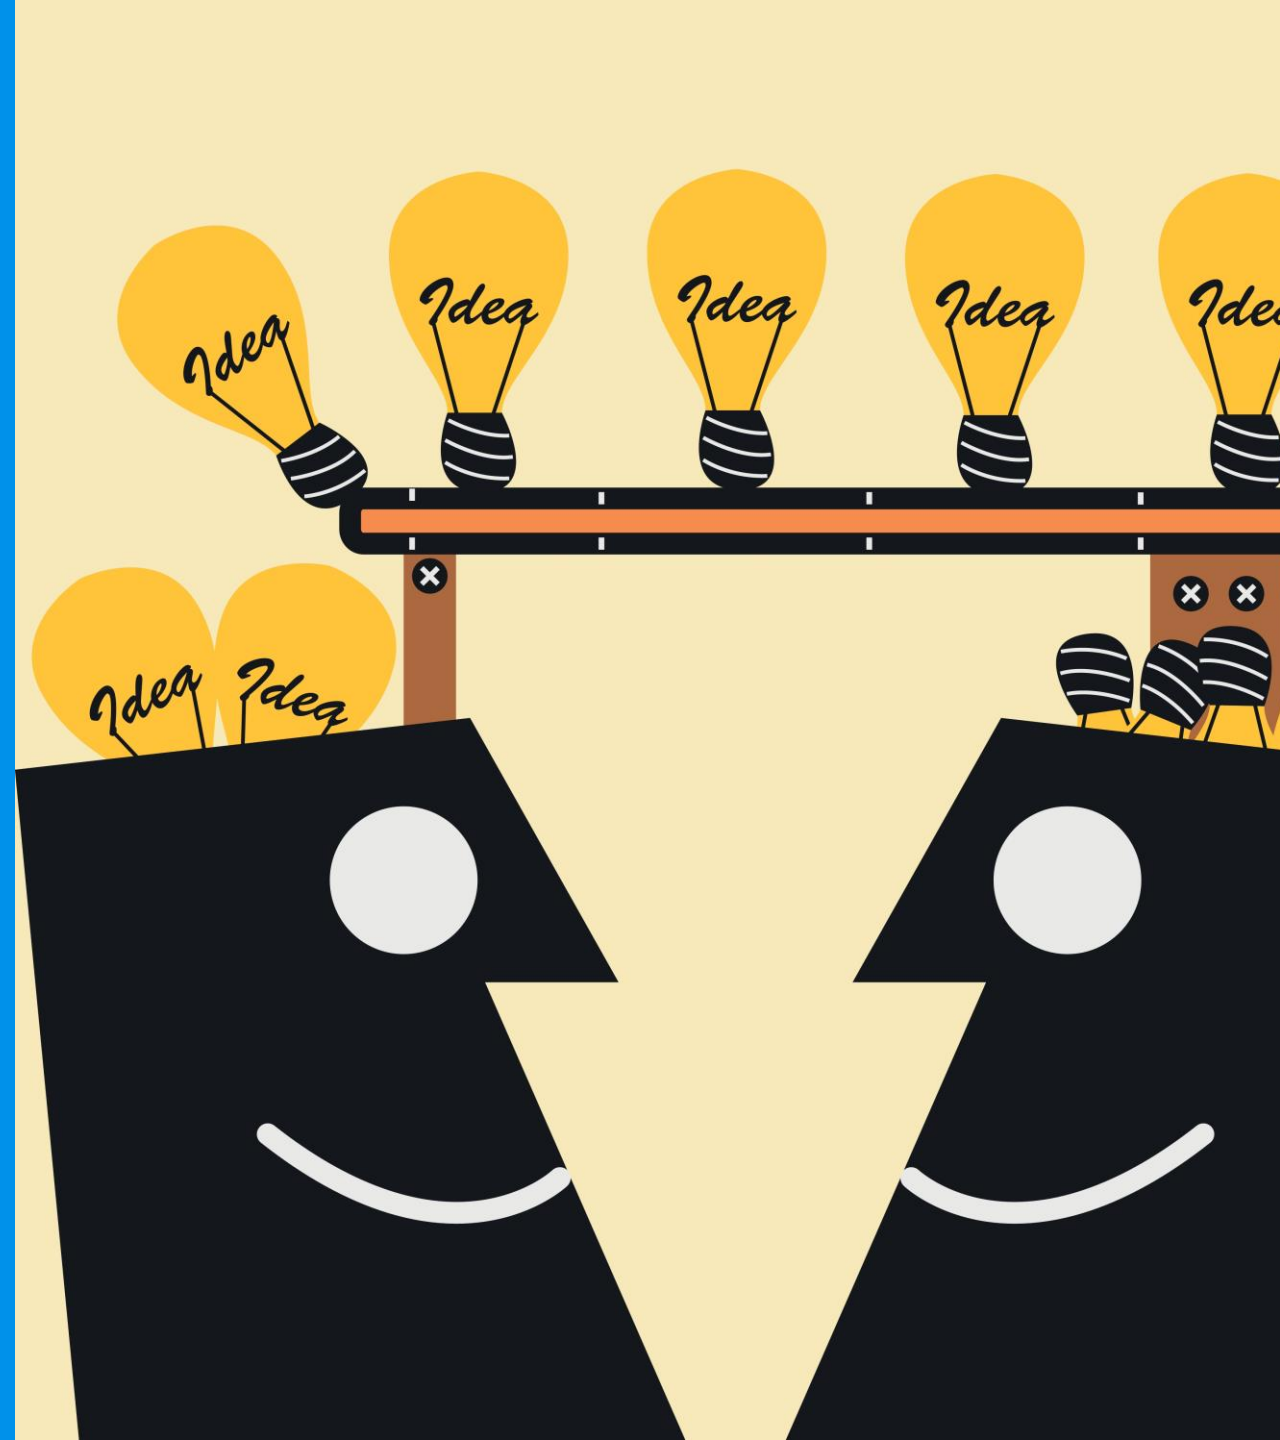

Together we will

Discuss and exchange knowledge

Unfold challenges and expectations

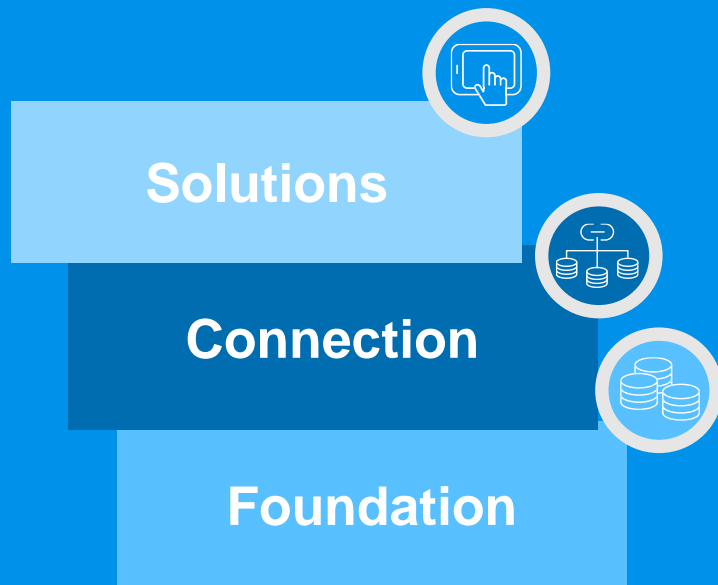

Hopefully place some steppingstones
for the future

The Agency for Data Supply and Infrastructure

Provides the public and private sector with high-quality data and digital infrastructures that enables important societal decisions

Free and open spatial data via digital platforms

Digital, data driven society calls for collaboration

The agency is on a journey

Expanding the value proposition.....

Why

Increasing demand for a public sector, which is:

- Relevant (user and demand driven)
- Targeted (user engagement)
- Executes fast (time to market)
- Scalable and flexible (responsive)

What is a data ecosystem?

What is the problem?

How can an "ecosystem" help?

Once again welcome
