

DAFAGO - DANISH FORUM WORKING WITH BASIC DATA AND OTHER PUBLIC DATA

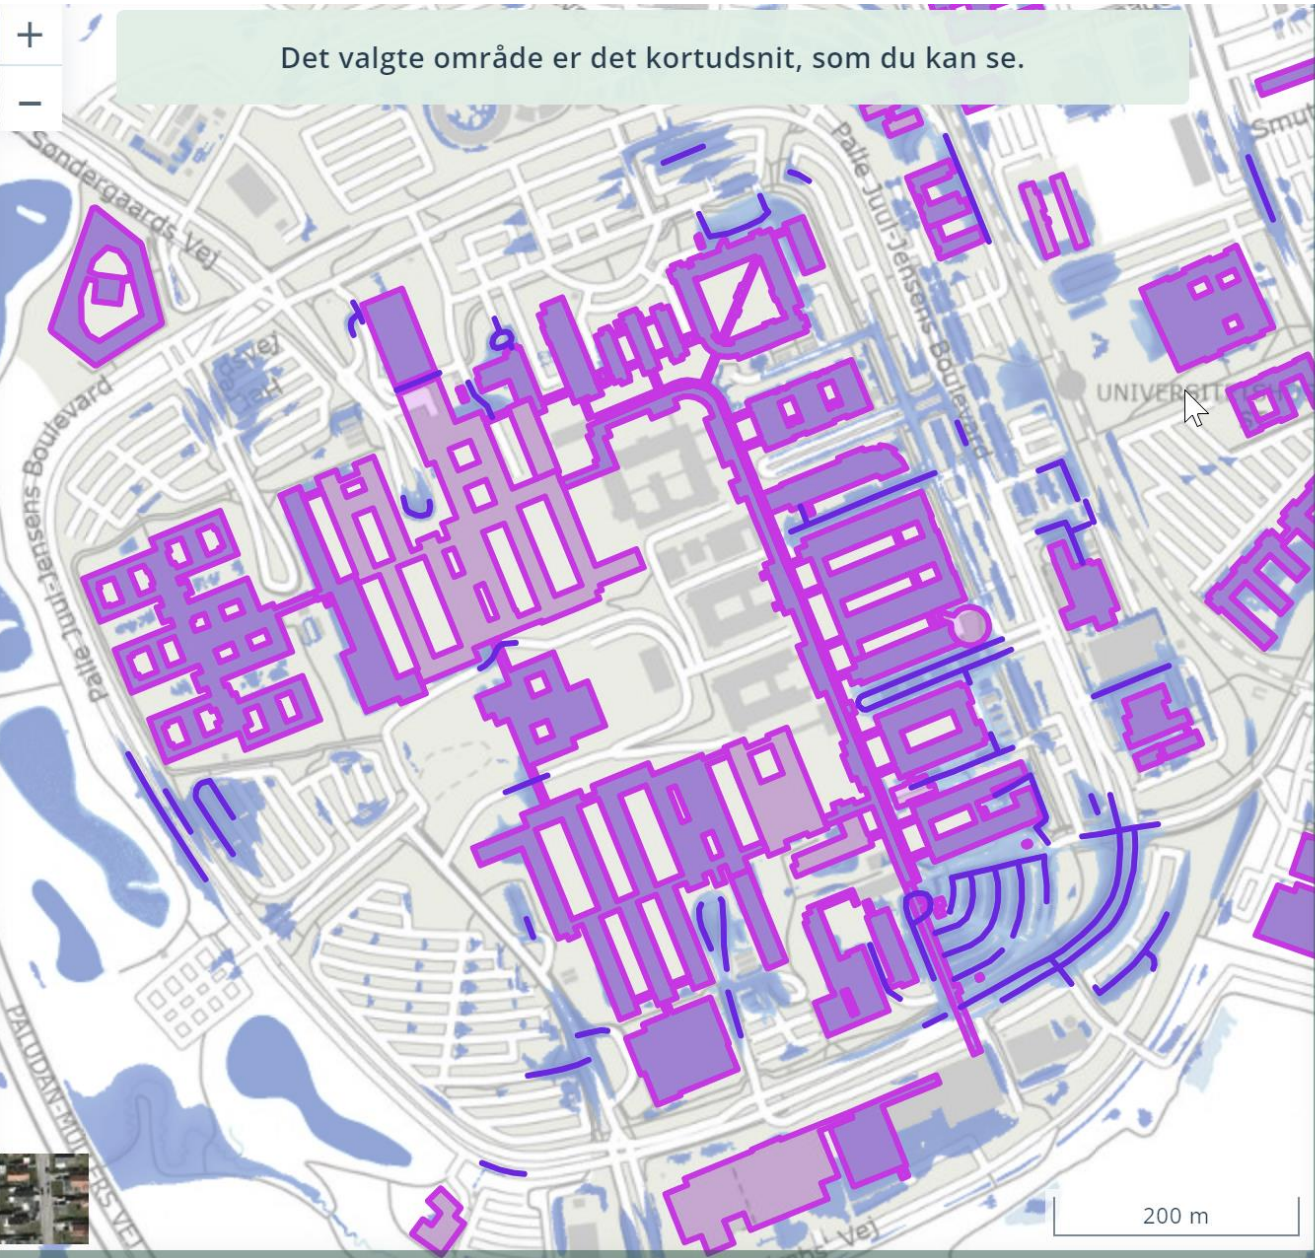

- formed by private companies to share knowledge and build
collaboration

Nils Mulvad

- Editor and Partner at Kaas & Mulvad and KM24.
- Investigative and data journalist for over 30 years.
- Co-founder of Dafago.
- Co-founder of the Global Investigative Journalism Network and several other journalistic organizations.

Purpose of Dafago

- A collective of private companies working with public data for many years.
- Familiar with each other, authorities, and common challenges.
- Primary objective: to enhance the use of data for public benefit, innovation, and development.

Challenges Observed

- Limited awareness of available data and how to access it.
- Key insights lost in data overload.
- Data scattered across numerous sources with limited guidance on integration.
- Helpdesk staff facing intense criticism leading to stress.
- A prevalent approach that fails to integrate data with other skills, such as journalism, thereby limiting its contribution to knowledge and decision-making.

I disse 21 kommuner er over 50 pct. af boligerne vurderet helt skævt

Fejl i ejendomsvurderingerne rammer landområder

Common Misunderstandings

- Understanding budgets.
- Comprehending personal taxes.
- Valuating properties.
- Documenting wages.
- Interpreting agreements.
- Registering own property (BBR) – addressing over-registration and learning prioritization.

Measuring Success: Present and Future

- Attendees at meetings acquiring useful new knowledge for their businesses or personal use, such as novel data structuring methods.
- Facilitating networking and collaborative development.
- Cultivating a focused attitude towards data utilization and drawing conclusions, measuring practical impact rather than just meeting or attendee numbers.
- Welcoming the public to our meetings to foster interest in the subject.
- Recognizing the longstanding need to bridge existing gaps.
